

Overall, I am pleased with the captioning on TV. However, some of the most significant information available is omitted from captions on some stations. I refer to the weather information on our local channel 2 and 6, NBC and CBS. Also, the placement and speed/sync of the captions often leaves something to be desired as they are placed at the top of the screen and reveal only one line at a time. Various technical problems like this are common, locally, and they are frustrating because the much needed captioning is there, but the comprehension is still lacking.
